Our Clients

About Us.

Introduction

BROLJJAD INTERNATIONAL LIMITED is a Nigerian-owned engineering and industrial services company committed to delivering reliable, innovative, and cost-effective solutions to the oil and gas, energy, marine, and industrial sectors.

Headquartered in Port Harcourt, Rivers State, we provide specialized engineering support, wellhead equipment services, welding and fabrication, corrosion protection, manpower supply, slickline operations, and well intervention services.

Our company combines experienced professionals, modern equipment, and industry best practices to deliver projects safely, efficiently, and within schedule.

Our commitment to quality, integrity, and customer satisfaction has positioned us as a dependable partner capable of supporting both onshore and offshore operations throughout Nigeria.

Mission & Vision.

MISSION

Our mission at Broljjad International Limited is to deliver reliable, high-quality, and cost-effective solutions for the oil and gas industry through fabrication, maintenance, refurbishment, installation, and supply of well completion equipment.

We are committed to enhancing operational efficiency, ensuring equipment integrity, and supporting safe, timely, and sustainable project execution. By combining engineering expertise, robust supply chain capabilities, and a deep understanding of the local terrain, we strive to be the trusted partner of choice for exploration and production companies.

VISION

To be Nigeria's leading provider of well completion equipment services, recognized across Africa for excellence in fabrication, refurbishment, and technical support.

We aspire to set the benchmark for quality, safety, and innovation by delivering Nigerian-made solutions that exceed global standards, reducing downtime, and enhancing well productivity. Through strategic partnerships, talent development, and investment in modern facilities, we aim to build a resilient oil and gas servicing ecosystem anchored in trust, quality, and sustainability.

Our Philosophy.

At Broljjad International Limited, our philosophy is built on integrity, innovation, and impact. We believe in delivering world-class solutions that combine technical excellence with local expertise, ensuring safety, reliability, and sustainability in every project.

We are committed to building long-term relationships with our clients through transparency, reliability, and exceptional service delivery. Every project is approached with professionalism, technical expertise, and a commitment to excellence.

Our Strategy.

At Broljjad International Limited, our strategy is built on an unwavering commitment to quality. We never compromise on the standards that define our brand, consistently upgrading our equipment, facilities, and human capital to ensure excellence across all operations.

As a fully integrated energy solutions provider, we are strategically positioned to deliver end-to-end engineering and logistics services to both offshore and onshore segments of the oil and gas industry.

We bring proven expertise, advanced technology, and strict compliance with international best practices to every project. Our highly skilled workforce is continuously trained and equipped to meet evolving industry demands. We foster an enabling work environment where employees can achieve their full potential, supported by competitive remuneration and performance-driven incentives.

Our corporate policy emphasizes undertaking projects that deliver lasting public value and enhance the quality of life within host communities. In line with this, we actively engage in Corporate Social Responsibility initiatives and maintain strong partnerships with oil and gas companies, government agencies, and private sector organizations. Safety, health, environmental protection, and security are at the core of our operations.

We consistently uphold global standards, ensuring clean, safe, and sustainable practices at every project site. Our track record demonstrates the ability to leave positive and lasting impressions wherever we operate.

Broljjad International Limited. continues to redefine passion and excellence in oilfield equipment sales, services, and maintenance—setting new benchmarks for quality and reliability in the industry.

Specialized Tracks & Training

TRACK A: Storage Tank Corrosion Control (PWT/TWT/FWT)

TRACK B: Pipeline & Spool Coating (10" to 42" Lines)

TRACK C: Wet-Season & Tropical Microclimate Management

COMMUNITY TRAINING

- Local Skill Development.
- Capacity Building for Communities.

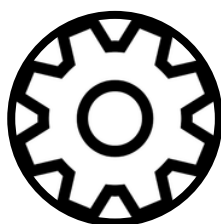

HSE TRAINING

- Health, Safety & Environment.
- Risk Management & Compliance.

INDIVIDUAL TRAINING

- Upskill & Certify Professionals.
- Technical Competency Development.

ASSET MANAGEMENT

- Asset Integrity Planning
- Reliability & Lifecycle Management

Corporate Organization Training

- Customized Corporate Programs.
- Team Capability Enhancement.

Scope of Service.

We deliver comprehensive services in partnership with global technology leaders, ensuring effective project execution and asset management.

Our Service Categories:

Oil & Gas Engineering

- Wellhead Equipment
- General Wellhead Maintenance
- Well Intervention
- Slickline Services
- Equipment Installation
- Equipment Testing

Industrial Services

- Welding & Fabrication
- Structural Fabrication
- Pipeline Welding
- Equipment Repairs
- Mechanical Maintenance

Equipment Rental

- Oilfield Rental Tools
- Industrial Equipment
- Specialized Engineering Tools

Corrosion Protection

- Surface Preparation
- Industrial Coating
- Protective Painting
- Asset Integrity Management

Support Services

- Manpower Supply
- Procurement
- Project Management
- Technical Consultancy

Engineering & Technology.

Wellhead Installation

- Installation of wellhead systems for onshore and offshore operations.
- Precision alignment, assembly, and pressure integrity verification.
- Compliance with industry safety and operational standards.

Wellhead Maintenance

- Routine inspection and servicing of wellhead equipment.
- Repair and replacement of worn or damaged components.
- Performance optimization to maximize equipment lifespan.

Pressure Testing

- Routine inspection and servicing of wellhead equipment.
- Repair and replacement of worn or damaged components.
- Performance optimization to maximize equipment lifespan.

Mechanical Installations

- Installation of pumps, compressors, vessels, and rotating equipment.
- Mechanical alignment, leveling, and system integration.
- Commissioning support for safe operational startup.

Equipment Inspection

- Comprehensive visual and technical inspection of mechanical equipment.
- Identification of defects, corrosion, and operational risks.
- Recommendations for repair, replacement, or preventive maintenance.

Wellhead Maintenance

- Routine inspection and servicing of wellhead equipment.
- Repair and replacement of worn or damaged components.
- Performance optimization to maximize equipment lifespan.

Valve Servicing

- Inspection, disassembly, cleaning, and reassembly of industrial valves.
- Repair or replacement of seals, seats, and internal components.
- Functional testing to ensure reliable operation.

Pipeline Maintenance

- Routine inspection and maintenance of pipeline systems.
- Leak repairs, flange maintenance, and corrosion control.
- Preventive measures to improve pipeline reliability and safety.

Fabrication Engineering

- Design and fabrication of structural steel and mechanical components.
- Precision welding and assembly using approved procedures.
- Quality assurance to meet client specifications and industry codes.

Shutdown Maintenance

- Planned maintenance during plant shutdowns and turnarounds.
- Rapid execution of inspections, repairs, and equipment replacement.
- Safe project completion within scheduled downtime.

Preventive Maintenance

- Scheduled servicing to reduce equipment failures.
- Condition monitoring and early fault detection.
- Maintenance planning to improve operational efficiency.

Equipment Refurbishment

- Restoration of worn or damaged equipment to operational condition.
- Replacement of defective components and performance upgrades.
- Functional testing and quality assurance before redeployment.

Robotic Tank Coating

- Apply protective coatings to internal or external storage tanks, enhancing safety by eliminating confined space entry and working at heights.
